

Coaching the Lift Truck Operator 2

Train-the-Trainer

July 21, 2010
(details inside)

**What are the benefits of training
your employees to train each
other?**

Answer inside.

Benefits of Train-the-Trainer

- training your employees on the safe use of lift trucks, both as operators and pedestrians, can save more than potential OSHA fines and workman's comp claims...it could save a life
- training your own safety leaders to train other lift truck operators can save your company money by providing trained instructors that are available when and where you need them most...no more waiting for the next class
- training your employees to train others can help build confidence, trust and teamwork within your workforce

Coaching the Lift Truck Operator 2

Train-the-Trainer

This course will help companies comply with OSHA Standard 1910.178. Specifically, Train-the-Trainer provides the skills necessary to teach the classroom and hands-on required component of lift truck safety.

Participants will learn:

- skills and techniques for safe lift truck operation and maintenance,
- practical information for developing an in-house training program,
- exercises for evaluating hands-on performance by your operators, and
- how to educate non-operators on working safely around lift trucks.

Payment

Payment for this course is due with registration, or mark "invoice company" on your enrollment form with a valid Purchase Order Number. Training Kits will not be ordered until payment is initiated.

Jack Fillinger, Instructor

Jack Fillinger, CSP, received his Bachelors of Science and Master of Science degrees in Industrial Safety from Central Missouri State University. He worked in manufacturing for over thirty years, and since 1993 has served as the manager of Occupational Services for the Safety and Health Council of Western Missouri and Kansas. Mr. Fillinger has specialized experience in developing and managing safety and health programs which include conducting facility safety audits and inspections. He is experienced with employee exposure surveys including noise level monitoring, air sampling ventilation, and illumination. In addition to safety training for the Council, Mr. Fillinger conducts training for various organizations including the Federal OSHA training Institute, Maple Woods College, and many others.

Training Kits include:

- the National Safety Council's scripted trainer's manual with step-by-step presentations, guidelines, tests, registration forms, inspections and performance checklists, OSHA background information, and exercises for conducting hands-on training,
- two DVDs that correspond with training materials, and
- one Operator Response Book— a 32 page workbook with course completion certificate.

Cancellation Policy

Course materials must be pre-ordered after registrations are received. Cancellations received after July 9, 2010 will be billed the full price of the Trainer's Kit, plus a \$50 administration fee. No shows will be billed the full amount. Substitutions will be permitted.
